# Want to Quit Work 5, 10, up to 15 Years Early?

INTRODUCING WHAT COULD BE...

## The World's Most Profitable "Side Job"

**Can you spare a few minutes? Before breakfast, after dinner, or on a lazy weekend?**

That's all it takes to potentially start earning an extra \$400 to \$1,000 per day, free and clear. Not just tomorrow and the next day... **BUT COULD BE EVERY SINGLE TRADING DAY IN 2021!**

"Take action by June 30 2021, and I'll show you how you could turn an average **\$500 investment** into a massive **\$50,000 fortune.**"

[See details inside...](#)

### Dear Reader

Are you like most Americans your age? You've dabbled in the stock market over the years.

Maybe you've hit the jackpot a few times, doubling or tripling your money.

But no one talks about all the times they rolled the dice. And came up empty.

Today, I'll show you how to access a little-known portal in your brokerage account

to potentially amass a quick fortune.

I'm talking about starting with a minimum average investment of just \$500...

And potentially turning it into a mind-blowing \$50,000 payout!

Now, before I go on, let me assure you:

- You do **NOT** need to be an experienced investor...
- You do **NOT** need a lot of money (a minimum average investment of only \$500 will get you started)...
- And you do **NOT** need a lot of free time.
- What you're about to see is a little-known investing secret.

If you have a computer, a basic internet connection, and a starting sum of at least \$500, you can get started today.

You could start collecting a sizable new payment every single trading day – almost on autopilot.

Imagine opening up your laptop tomorrow morning to discover an EXTRA

\$450...

\$785...

\$2,247...

up to \$5,000

sitting in your account.

Heck, one recent morning, I added an extra \$4,185 in profits to my bottom line.

And I did it before my coffee got cold!

With the [World's Most Profitable "Side Job"...](#)

We've averaged an extra **\$554.76 per trading day**.

That works out to a mouth-watering \$144,237 on an annualized basis.

Can you think of a few things you'd like to do with a juicy "second income" like that?

Like buying that little red sports car you've had your eye on for years...

Or surprising your spouse with an around-the-world cruise?

Then this 'side job' is for you.

It's incredibly simple to get started.

You only have to clock into our private Trading Room twice a month, each time for a quick 60-minute session.

Can you commit to doing that?

I'll tell you EXACTLY what I'm doing.

You can simply cut and paste what I give you.

And if my recent track record holds up, as it should...

Your bottom line could grow by leaps and bounds.

Between \$400 and \$1,000 in extra profits per day, on average... based on recent history.

But there is one catch.

While gains of this magnitude are possible almost every single trading day,

**This could be your only chance to turn an average investment of \$500 into a \$50,000 treasure chest during 2021.**

That's because I've spotted a major new technical event emerging on my charts.

One like I haven't seen in years.

Last time I spotted an opportunity of this size...

**I was able to turn an initial deposit investment of \$500 into \$39,282!**

Here's the best part...

My indicators say it's about to happen again. And this one has the potential to be far BIGGER than anything that came before it.

Believe it or not, anyone who takes action today has a real chance to turn a minimum average investment of \$500 into \$50,000...

But for you to qualify for this massive payout, you need to take immediate action.

Because June 30 2021 is the final deadline.

## Great News! This "Side Job" Could Make You Independently Wealthy – **FOR LIFE.**

The best way to show you how explosive this situation can be is to give you a peek into my own personal trading account.

Take a look at this amazing chart.

It shows my performance over a 51 trading day period...

## WHAT WOULD AN EXTRA \$37,723.54 DO FOR YOU OVER THE LAST 51 TRADING DAYS

When's the last time you had a chance to get more than \$37,000 RICHER...

In just 90 days...

Starting with an average \$500 investment?

Let me clarify.

This snapshot is from my own live-money trading account.

It's real money. Real profits.

And in case you're wondering, This opportunity has nothing to do with

**Bitcoin, selling options, shorting, Forex or anything like that.**

I call it the "underground" market. And it's a lot like buying and selling stocks.

Except things move a whole lot faster.

So what's required of you?

Just to click into my private Trading Room twice per month, for just 60 minutes per session.

That's where all the action happens.

Can you commit to doing that?

Good. Because this market is on FIRE!

During those 51 trading days I just showed you, Something truly amazing happened.

**I managed to book an average profit of \$554.76 per trading day.**

That's my AVERAGE performance.

Individual paydays can be much, much higher.

Heck, one recent morning I cranked out \$5,915 in profits – before the clock struck noontime!

## TRUE STORY...

# How I Ran Up a Towering \$19,000 in Winning Trades — Between July 19th and 30st, 2019. Like Clockwork!

The trading paydays I'm showing you today are not only super-profitable...

They're super-quick, too.

Let me show you exactly what I mean.

In a stretch of less than 2 weeks last July, the action in and out of our private trading room went ballistic.

Here's how it unfolded...

I came into trade like always on Friday, July 19.

Then came a rollicking 10-day bonanza like you wouldn't believe.

By noontime on Day 1, we already had \$4,230.80 in the bank.

Gross realized PnL	Realized PnL	Unrealized PnL	Total PnL
\$0.00	\$0.00	\$0.00	\$0.00
\$4,340.00	\$4,230.80	\$0.00	\$4,230.80

**\$4,230.80 -7/19/2019**

The following Monday, we added \$2,037.20 to our kitty.

Realized PnL	Unrealized PnL	Total PnL
\$0.00	\$0.00	\$0.00
\$2,037.20	\$0.00	\$2,037.20

**\$2,037.20 -7/22/2019**

The very next day, we added \$3,780.10 more in underground wins.

Realized PnL	Unrealized PnL	Total PnL
\$0.00	\$0.00	\$0.00
\$3,780.10	\$0.00	\$3,780.10

**\$3,780.10 -7/23/2019**

On July 29, we made another super-quick \$1,664.96 in profits for the day.

Realized PnL	Unrealized PnL	Total PnL
\$0.00	\$0.00	\$0.00
\$1,664.96	\$0.00	\$1,664.96

**\$1,664.96 -7/29/2019**

The next day, we got \$5,766.42 richer.

Realized PnL	Unrealized PnL	Total PnL
\$0.00	\$0.00	\$0.00
\$5,766.42	\$0.00	\$5,766.42

**\$5,766.42 -7/30/2019**

Finally, on July 30, we topped up our pile of winnings by another **\$2,267.20**.

Sure, any one of these paydays was sweet on its own.

**But all together, we managed to pocket over \$19,000 in winning trades in less than 2 weeks.**

Honestly, I haven't seen anything this lucrative in years.

It's almost like you can enjoy profits – on AUTOPILOT.

Without touching a single stock.

Is that something you'd be interested in?

The underground market is ripe with profits – no matter which way the market goes.

I'll rip the lid off this incredible opportunity for you in 2 minutes.

**But first...**

It's important you know who I am. And why I'm so confident about this strategy.

# THE STORY OF THE "PRODIGAL SON"

**My name is Joshua Martinez.**

I'm a 10-year trading veteran and professional financial analyst.

Maybe you've seen my work inside some of the industry's most respected trading publications.

But my road to the top was anything but straight.

I'm way different from all those so-called "gurus" you hear about.

First off, I don't have a high-priced M.B.A. And I didn't learn the tricks of the trade from inside a big Wall Street institution. Instead, I learned everything I know from the school of hard knocks.

Like back in 9th grade when I joined the school wrestling team. That was life changing for me. It was the first time I learned how to channel all my energy and focus on achieving something big.

Things were going great. I started winning championships. Then a lightning bolt struck from out of the blue.

A diagnosis of Graves Disease. My doctor said it was so serious, I needed to quit wrestling or risk having a heart attack. What a shock.

I spent my senior year in and out of the hospital undergoing radiation treatment. All of a sudden, my goal of a wrestling scholarship vanished into thin air. Heck, I was barely able to graduate from high school.

What do you do when your anchor is ripped from you? You drift for a while. That's what happened to me.

I went to school to become a professional firefighter – and led my squad until the governor of Florida slashed funding, and I lost that opportunity.

Then I became a certified personal trainer.

I performed so well I was promoted to assistant manager, then to general manager, and finally I got to manage my own gym.

But I was barely able to pay the bills. I was devastated. There I was working up to 15 hours per day, 6 days per week, but barely making \$20,000 per year.

What kind of life was I creating for myself and the love of my life? Finally, I said enough is enough. I switched gears and started working for a financial education company.

I was so excited that I got the job. First, I did all the grunt work.

Little did I realize, it came with a silver lining.

Being in the trenches allowed me to sharpen my skills on the nuts and bolts of how trading actually works...

How real money is made in the market.

I got so intrigued I opened up a demo account and started "playing" around in the market myself.

Eventually I developed a way for my students to make \$500 per day, based on the European market open.

Before I knew it, I had thousands of people signing on for my trading sessions.

## Long story short...

I became one of the most successful trainers in the business.

So successful, in fact, that I decided to open my own business called Traders Agency in September 2019.

We've been doing gangbusters ever since.

As you're about to see in this clip from inside my Private Trading Room...

We managed to make over \$20,000 in just 3 short days.

The simple trades were executed on Friday, Monday and Tuesday...

And we ended up with a total of \$21,283.90 in profits!

What's so great about this underground market is it lets the little guy investor make BIG profits with very LITTLE money upfront...

All while using strategies that reduce risk... are not complicated... and very, very simple to use.

OK, I'll bet your asking...

What is this underground market, and how can you raid it for such a nonstop bonanza of profits – no matter what's happening in the regular market?

## Busting The Great Investing Myth

When you hear me say I've chosen to excel in the high-speed, high-stakes world of financial trading...

You may get the impression that I'm a gambler.

But you'd be dead wrong.

I'm about as far from a wheeling, dealing, speculator as you can get.

You know how Wall Street pundits like to say it's virtually impossible to time the market?

That all relevant information is currently baked into a stock's price?

Well, that may be true for the stock market.

But it's definitely NOT the case for the underground market I'm introducing to you today.

My years of research looking at historical price moves and technical indicators have proven you can **pre-determine** when the big indexes will rise or fall...

With scary accuracy.

No, I don't chase specific stocks in the S&P 500, Nasdaq, and Russell 2000

Instead, I trade Futures on these major indexes.

That's where I've become a master, and my followers tell me, they are making an absolute mint.

So why did I choose Futures over all the other opportunities out there?

Here's my answer in a nutshell:

- **ADVANTAGE #1:** The Futures market is a pure, pattern-driven market which can be predicted – almost scientifically.
- **ADVANTAGE #2:** You can only buy and sell in the Futures market... nothing else.
- **ADVANTAGE #3:** I've discovered an edge that allows me and my followers to tip the scales dramatically in our favor – on every trade we make.
- **ADVANTAGE #4:** You can get started with as little as \$500 in a position... and there is no cap on how much upside you can make.

## It's Time to Take Everything You've Heard, and Throw It In the Dumpster!

### Now, there's one thing I need to address...

When a lot of people hear the word 'trading', they start thinking they are in way over their heads. "It's dangerous... it's for pros... it's so volatile."

That's nonsense.

What I'm actually talking about is an investment strategy that when used properly, can be more conservative than "buy and hold"...

And still deliver multiples of the market return.

Trading the Futures market – when exercised properly – can actually REDUCE your risk because, unlike stocks, you can put less money on the line.

By following my guidance starting today, you could experience a whole series of victories...

1. **WIN No. 1:** Make up to ten times the average market return – predictably and annually -- with potential gains as high as 1,000% or more.
2. **WIN No. 2:** Avoid high loss periods.
3. **WIN No. 3:** Reduce the money you put at risk by 50%, 75%... as much as 90%.

### All at the same time!

Consider the basics...

The regular stock market gives you have a 50% chance of being right,  
And a 50% chance of being wrong.

But by making an investment in the Futures market, you dramatically improve your odds. By accessing a different portal in your account, you immediately boost your odds of hitting the jackpot from 50% To 60%... 70%... 80%... 90%...

All the way up to a whopping 95.2% chance of being right and bagging a profit.

That's like going 20 for 21 EVERY TIME YOU INVEST.

That's almost unheard of, right?

# Maybe You're Saying, "I'm Not Ready for Something As Powerful As This."

Let me assure you...

If you've dabbled in the stock market, you have what it takes.

Right this minute, I have thousands of loyal followers, and they are NOT professional investors.

They don't have access to any special technology, and they wouldn't dream of staring at a PC screen for hours each day.

These are regular men and women ... teachers, firefighters, and small-business owners who were brave enough to make the big switch.

Cameron P. from Kansas shows you what's possible.

He wrote in to say

**"After a short 30 minutes of trading on a Sunday, I got \$6,915 richer."**

The table has columns for Trade No., Buy/Sell, Account, Strategy, Shortage, Date, Price, Lot size, Entry time, Exit time, Entry type, Exit type, Profit, Loss, Commission, and Date. Then there's Martina L. who says, "Made \$2,000 between last night and this morning thanks to you!"

## MY STUDENTS ARE DOING IT TOO

ACTUAL Student

"Made \$2,000 between last night and this morning thanks to you!"

We also heard from Dan T. who told us, "This is amazing. It only took 55 minutes to make \$425. And I would have DOUBLED this if I had taken the other signals. I won't make that mistake again.

## MY STUDENTS ARE DOING IT TOO

Student

I have been back-testing, forward-testing, and paper trading Josh's trading strategy for the past month, and I finally got tired of watching all of the winning trades go to waste (about 3 out of 4 trades have been winners, and most of the losers were easily recovered by re-entering on the next signal)

So, today, when I say a buy signal on ES, I decided to make some real money.

This is amazing! It only took 55 minutes to make \$425. And I would have doubled this amount today if I had taken the other signal on ES and RTY. I won't make that mistake again 😊 Thanks Josh!

### So the choice is yours...

You can drop \$5,000 or more in the regular stock market, hoping and praying that you get the company and precise timing right... Or you can plunk down an average of \$500 per trade in the Futures market instead. By following my lead – literally by cutting and pasting what I do in my Private Trading Room -- you'll have a realistic opportunity at turning a tiny \$500 minimum average investment into \$50,000.

Doesn't that sound like something you'd like to try?

### "Recession Proof Market"

"This market is considered recession proof. You can make money when the market is up --and you can make money when the market is down.

The Futures market is a market I love, respect, and is a provider for making my financial dreams come true."

## Introducing the Most Bankable Pattern You'll Ever Encounter

No matter how many times I say it, some people still don't believe me.

They think in order to make BIG money in the stock market, you've got to do something really complex and difficult.

But the exact opposite is true.

**You simply have to follow the signals...**

**And look for a repeatable, highly dependable trend.**

Now, you probably understand how some cycles work.

For example, retail sales spike every year after Black Friday...

Gas companies record windfall sales during the frigid winter months when people need more gas to heat their homes...

And every year, beer sales skyrocket with the arrival of Memorial Day, baseball and cookouts.

Of course, these trends are fairly obvious.

Knowing them doesn't give you much of an advantage.

But I've discovered something else that, for investors,

Represents the difference between struggling, perhaps breaking even...

And allowing you to potentially become **independently wealthy for the rest of your life!**

My secret?

I've become one of America's leading experts at identifying powerful financial patterns that repeat themselves over and over again.

For example, take a look at this chart.

In this case, we're tracking price movement on the S&P 500 Futures market over a 2-year period.

The general trend is upward.

But pay special attention to all those little green arrows.

Each one is a 'U-Turn' in the overall price trend.

Notice how almost every time the price hits the support level... represented by the blue line at the bottom...

The price jumps right back up. Like clockwork!

This high level of predictability lets me effectively rig the market – in YOUR favor.

Each time the price hits that blue line,

I issue a BUY SIGNAL in the knowledge that I have an excellent chance of being right –

And banking a new payday.

# While investing will never be fully SCIENTIFIC, this is as close as it gets.

Now, let me show you a more recent chart.

This one has not only a blue support line (where the price doesn't want to fall below... It also has a red resistance line – where the price doesn't want to rise above

See how we get a nice channel, from left to right? With a solid border on either side?

Think of these lines like bumper rails in your local bowling alley.

They keep the ball moving down the lane.

Now, you don't have to be a Harvard graduate to know what happens when you

approach one of these lines.

Whenever the price hits the top blue line, the market generally falls...

Whenever it touches the bottom blue line, the market generally rallies.

Even if the market breaks out of the channel, believe it or not you can still rake in serious profits.

You just need to understand the pattern.

Expert traders like me exploit this telltale signal all the time. For MASSIVE profits.

It's also one of the few ways the average investor can get an edge on the market. Reliably and consistently.

My unique approach allows me to predict these U-Turns with laser-like accuracy.

This pattern has identified these U-Turns up to 20 out of 21 times, allowing me to predict

future U-Turns with 95.2% accuracy

Incredibly, this gives you an opportunity to place a winning bet 20 out of 21 times.

Your odds for winning jump from 50/50... all the way up to 95.2%. Practically over night.

No wonder I call it the Millionaire's Pattern...

Where else in the investment world are the odds so dramatically slanted in your favor?

Answer... No where that I know of.

# Massive \$50,000 Payday Scheduled to Pay Out on or Around June 30 2021.

Now for the real reason I'm talking to you today.

Since January 2018, a new Millionaire's Pattern has been developing.

I've been keeping close tabs on it. This one happens to be forming on the NASDAQ 100.

Let me show you what I'm seeing now.

Here it is.

See all the U-turns within the channel? Both up and down.

See how the price bounces UP when it hits the bottom support line...

And the price drops DOWN when it touches the top line?

The important thing to know is, while these lines are only pen on paper...

They may as well be CONCRETE WALLS.

As the price bounces around within the channel, you can predict with EERIE ACCURACY when a major U-Turn could take place.

And even if the market breaks out of those concrete walls...

Talk about an exciting moment! Your profit opportunity could dramatically increase!

My job is to decipher essential information from the charts...

Monthly, weekly, daily.

All the way down to the exact hour.

Once I identify when the U-Turn will happen, I make an intelligent bet on which way the market is going next.

Lucky you...

All you have to do is follow my lead!

Don't be surprised if you end up pocketing an EXTRA \$400 and \$1,000 paycheck every time we meet.

That's the kind of profit action we've been seeing in my private Trading Room.

And I can tell you that as of this morning at 9:30 a.m., we are witnessing another major inflection point.

Take a look.

See how we're bumping up against the top line once again?

Right now, the market is at an all-time high.

Any guesses what that means?

A correction or retracement is imminent.

In fact, the last five times it happened, the price was forced right back down.

If this pattern persists, we should see an overall bearish push that will take the price all the way down to the bottom line again.

That's excellent news for smart traders like us.

Sure, it may take a few trades, but

If you start out with a minimum average investment of just \$500...

And trade strategically on the way down...

**My calculations show you could realistically turn that \$500 into a giant \$50,000 cash pile if you start before June 30 2021.**

Tell me this...

Why on earth would you invest \$5,000 or more in the volatile regular market...

Hoping and praying for a measly 5% or 10% return...

When you can invest just ONE-TENTH the amount per trade – and make nearly \$50,000 in profits if my prediction comes true.

# My friend, it's the BEST pattern... with the BEST pricing... and you get in at the BEST possible time.

I'm thrilled you've stayed with me until this point.

That confirms my gut feeling that you are the right type of investor for this venture.

Here's the most urgent message for today – by far.

**All the results I've shown you so far were BEFORE my latest signals started going berserk. BEFORE the mother of all opportunities opened up before our eyes.**

Back then, my forward-looking indicators were **nowhere near** as strong as they are today.

In fact, what I'm seeing on my screens now has only happened TWICE in the last five years.

Last time I spotted a "Millionaire's Pattern" developing in a back channel of the financial market...

**I was able to turn an initial deposit investment of \$500 into \$39,282! Crucially — it looks like it's about to happen again.**

If my analysis is correct...

You'll NEVER have a better chance of turning an average investment of \$500 into a \$54,430 treasure chest.

The target payout date is June 30 2021.

That's just around the corner.

## But there is Only One Way You Can Access my Private Trading Room

Now, before we go any further...

I want to be straight up with you.

There are a few key facts you need to know before you reserve a seat in my next Trading Room session.

**FACT #1: This is very different from what you're used to seeing.** There is no monthly newsletter. No complicated system you need to follow. No tons of reading between sessions.

Your main benefit is twice-monthly V.I.P. access to the **Futures War Room**, where I divulge all the new breakout opportunities appearing on my screens.

I don't fool around during each 60-minute online session.

I cut through all the B.S. out there, and go straight to the TOP, most lucrative trade opportunities available in the market at that moment. You leave each session knowing exactly what to do. When to do it. And how to do it.

I don't take advertising dollars. I don't get paid to make recommendations. And I certainly don't follow in the footsteps of the mainstream investment media.

Remember, being able to reach out and grab a life-changing payday is exceptionally rare.

This newest pattern is shaping up perfectly.

## Hit Pay Dirt Just Once, and You're on Your Way to Becoming Independently Wealthy – for LIFE!

But they're verified and 100% true.

You have all the tools I recommend you have to get started.

During that 60-minute session, you can trade right alongside me.

Then it's up to you whether to execute the trade in your own account.

Look at Tanya M., who wrote in to say she **banked \$1,300 in about 30 minutes.**

## Student

Day 2 another 30 minutes and \$1,300.00

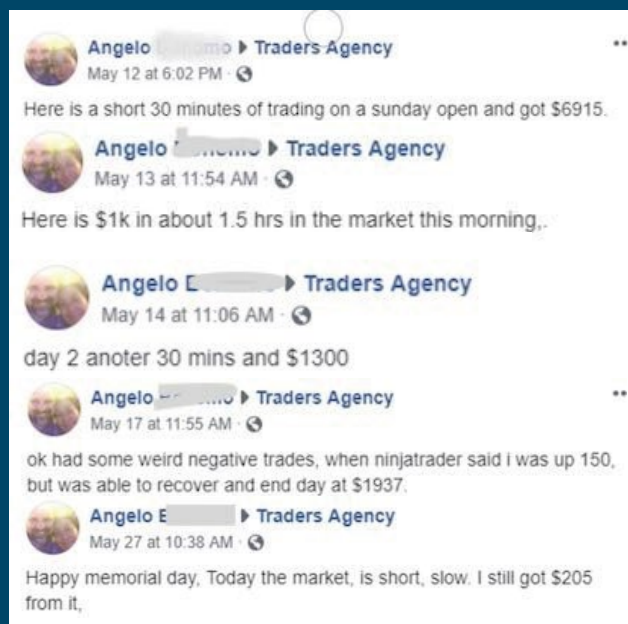

[illegible]

Then there's Angelo. He's one of my most loyal members.

He was one of those doubters who thought trading wasn't for him.

I proved him wrong.

In May, just days after we officially opened the Futures War Room, he sent me this markable series of updates about actual results he experienced in his own account:

- May 12 => "Short 30 minutes of trading and I'm up \$6,915."

- May 13 => "Earned \$1,000 in about 1 ½ hours this morning."

- May 14 => "Another 30 minutes, another \$1,300 in profits."

- May 17 => "OK. Not everything went my way, but still able to end the day up \$1,937."

- May 27 => "Happy Memorial Day! Today the market is short and slow. I was still able to raid it for \$205."

- May 29 => "Did well today. Up \$2,185."

- December 31 => "I jumped out to \$1,450 in profits."

Gave some of it back but still up \$1,100 for the day."

Let's say you had advance notice (that's where I come in) – and the chutzpah to invest in the Futures market like Angelo did.

**You'd be more than \$14,000 richer. After just 7 trading days.**

See what I mean?

I don't care if you've never traded Futures before.

Winning streaks like this one have the potential to make you an absolute mint!

Let me remind you how simple this is...

Each time you enter my private Trading Room...

I'll hand you a chance to access a high-powered, relatively low-risk underground trade.

All you have to do is copy the trade instructions in your own account.

That's it. All it takes is a few minutes to get

the ultimate edge so you can generate

impressive wins like:

- **\$21,000** in less than one week
- **\$5,766** in profits in one day
- **\$2,119** in less than one hour

You have to admit...

Super-quick profits like these would go a long way toward paying for a luxury round-the-world-cruise for two...

Or a down payment for that 2nd home along the coast.

Wouldn't that be nice?

## Only 125 Will Be Guaranteed a Seat Today...

Now that my **Futures War Room** is a well-oiled machine, I'm finally ready to spread the wealth with a maximum of 125 new folks today.

Why only 125?

I want to maximize the potential gains for each reader... so you'll have the best opportunity to get in at the best price.

If too many people rush into the specific trades my strategy recommends in the Futures market, the profitability of your trades could be affected.

I don't want that to happen. And the best way to ensure it doesn't is by limiting the number of new members.

Don't forget...

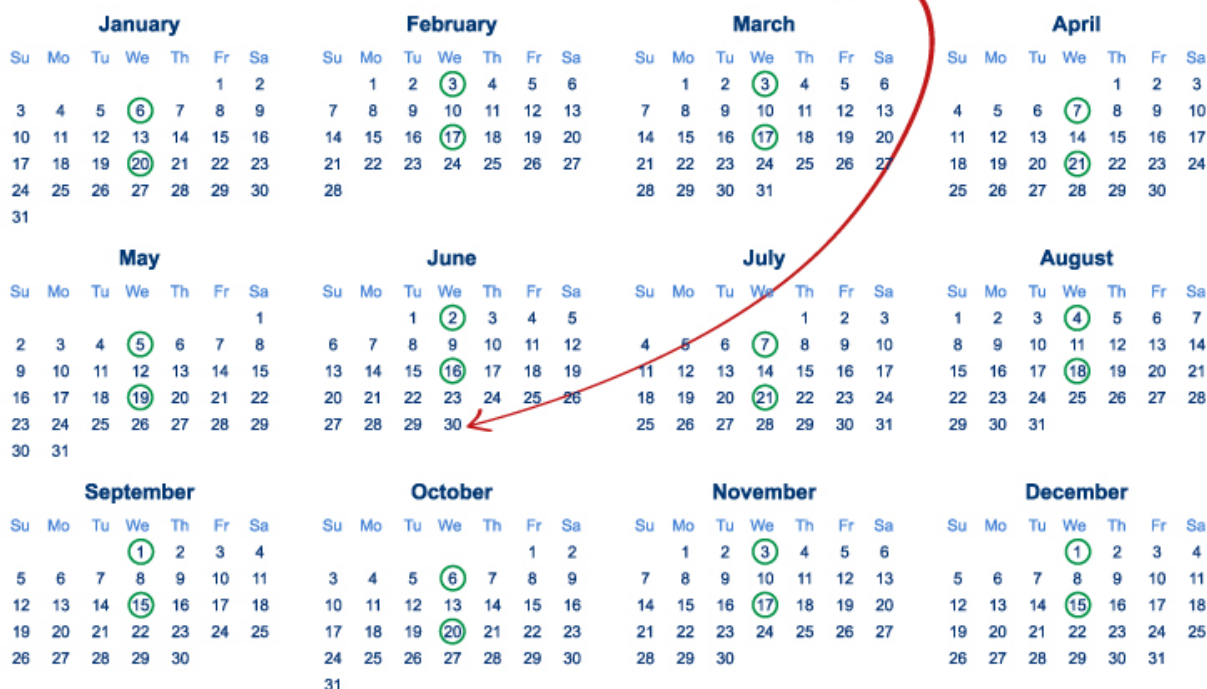

I can't think of a better time to get on board.

See all the green circles just ahead of us? Each one is a new LIVE trading session that you'll be invited to attend...

I expect to trigger a brand new trade in every single one of them.

# SEE ALL THE TRADING OPPORTUNITIES 2021

For Max Earnings  
get in before  
this date!

Remember, every circle is your chance to make ten times the profit – while risking up to 10 times less money.

Hit just one and you could be at least \$400 to \$1,000 richer... based on our track record so far.

Hit four or more and don't be surprised if your bottom line balloons by \$4,000... \$8,000... \$13,000 or more.

Now, I do need to clarify one point. Entrance isn't guaranteed.

## Here's the crucial part. So please, listen carefully...

Only 125 investors today will be allowed into my unique investment research and recommendation service, Futures War Room – on a first-come, first-serve basis.

So you'll need to act fast...

If you do get in, I promise I'll do everything in my power to help you get up and running by tomorrow at 9:30 a.m...

Hold on, there's more.

When you respond today, as an extra incentive, I'll rush you my brand new report on how to make 2020 your most profitable year ever.

Hot off the presses, it's called **Josh's Top 5 Underground Trade Symbols for Massive Gains.**

Think of it as your exclusive “trader’s playbook” showing you how quick and easy it is to exploit these lucrative and very reliable price trends...

In essence, everything you’ll need to tap the underground market for profits up to 1,000% more than you’re used to now... all while risking up to 10 times less money upfront.

Best of all, it’s yours to keep — no matter what you decide to do later!

## This serious big money opportunity won’t cost you thousands of dollars.

Look, this is extremely valuable information.

Serious traders would be happy to pay \$3,000... \$5,000... \$10,000 or more to jump on my twice-monthly live trading sessions.

But I didn’t create the **Futures War Room** to help the rich get richer.

Nothing would make me happier than to have YOU, the little guy investor, contact me in a month or two to tell me your dreams have been realized...

To say you’ve gone from being a cautious, run of the mill investor...

To being a wise and wealthy trader thanks to the Futures market.

All thanks to the World’s Most Profitable Side Job – that you didn’t even know existed before!

Let me make that happen for you.

Your entrance fee to gain access to my Futures War Room seems paltry in comparison to all the value I’m giving you today...

You get nearly \$4,500 worth of trading secrets when you add up all this...

I guarantee you this.

In the coming days, I'll tell you exactly how my strategy says we should get positioned for the mammoth \$50,000 payday I told you about earlier.

**Crucially — this setup has RARELY been seen in my 10+ years as an investment analyst.**

**Last time I spotted an opportunity of this size...**

**I was able to turn an initial deposit investment of \$500 into \$39,282!**

This time, the opportunity is even bigger.

I want you to be able to feel what it's like to turn a minimum average investment of \$500 into \$50,000 if you start before June 30 2021.

That's why I've agreed to offer you an extra special deal today.

So you won't pay 4 grand... you won't pay three... you won't even pay ONE-TENTH the retail price by jumping on this offer today...

Your one-year membership is only \$87 – a fantastic savings of more than 90%. That's an awesome deal!

Have you seen how much trading services cost these days?

They routinely run \$2,000, \$2,500, even \$5,000 per year and more...

I haven't seen many worth the hefty price tag.

So I created Futures War Room to be different than anything else out there. Both in terms of the spectacular — and spectacularly QUICK — profits it delivers.

But I have only 125 vacancies today. If you're lucky enough to snag a seat today...

You'll get to join me LIVE in my Trading Room from 11am to noon EST, twice per month, for 60 minutes of power trading.

The trades my strategy highlights are perfectly understandable...

Relatively LOW RISK...

Plus they're cut & paste SIMPLE to execute...  
Honestly, it's the best Side Job you could ever imagine.

## Delaying will be costly.

**CAUTION:** You may get a "Sorry, Room Full" message when you finally decide to join. That means I had an overwhelming response and the 125 available seats have been snatched up — so you may have to wait months for a new invitation. If I open it again that soon.

I can't say for sure that you're in until you ["Enter the War Room"](#) and confirm your participation. Once you're in, you'll have access to all this:

- **2 LIVE sessions per month in my real-time Trading Room.** This is my nerve center... a multi-dimensional trading floor where I exchange crucial information including what my indicators say to buy and sell, how, and at what price. You even get to interact with me via chat during these sessions.

Remember, I'll be in the Trading Room with you — maximizing the gains, minimizing the risks, and making sure you're comfortable with the fast pace

- **Post-Trading Room Summaries.** Don't worry. Even if you miss a session, you'll always have access to video replays, plus written details of the recommended trades.
- **Trading Idea Tracker.** Go here to track the trades we discovered during the live War Room sessions. This is a great resource to keep on top of how your real-life trades are performing.
- **Your VIP Members-Only Website** — Here you'll find anything you may have missed including War Room archives (both video and text formats), trade recommendation performance, Alerts, FAQs, and much more.
- **YOUR NEW MEMBER BONUS: Top 5 Symbols of 2020.**

As a special bonus for joining today, you'll get my exclusive "trader's playbook" showing how quick and easy it is to exploit this underground market for extraordinary gains. The ONLY place you can get this report is here... And only if you're one of the first 125 to respond today.

To sum up...  
You've seen what we've achieved since launching the **Futures War Room** about six months ago.

We're averaged over \$554.76 per day.  
If we keep up that pace all year, we could close out the year \$144,237 RICHER!  
And the momentum in our Trading Room is only getting stronger.  
Now's an ideal time to get on board.
